

Wasatch Peaks Credit Union

TVS Pro Project

Wasatch Peaks Credit Union remodeled their three-story headquarters in Ogden, Ut, as well as their branch and call center, to modernize with the latest in A/V technology. We installed a distributed audio system throughout, as well as Sony flat panels - used for digital signage. On the 1st floor of their headquarters, it was redesigned to serve as a large training room that can be divided into three separate rooms - all equipped with the latest in Panasonic projection, and a video conferencing system complete with Shure ceiling mic-arrays and Aver PTZ cameras. Their boardroom, located on the 3rd floor, was also equipped with Shure ceiling mic-arrays, two Aver PTZ cameras, and two Sony 85" panels for a complete web-conferencing solution all integrated into one Extron control system.

Key AV Equipment: Extron control system, Sony flat panel displays, Panasonic projectors, Aver PTZ cameras, Shure pendant ceilings microphones
