

Community Ambulance - Henderson, NV

TVS Pro Project

Community Ambulance provides advanced life support ambulance services for emergency and non-emergency transportation of patients. They came to T.V.S. Pro looking to upgrade their main large conference space, but also have the capability to divide it up into three separate training rooms. The space was to have video conferencing and interactive capabilities in all areas.

We installed 2 Newline 86" displays and an Epson interactive projector and screen. PTZ cameras were mounted in 3 separate rooms. Extron was used to control the systems.

Key AV Equipment:

Shure MXA710 mics and P300-MIX processor
Extron IPCP Pro 350Xi control processor, 10x8 DTP CrossPoint 4K matrix switcher, and 10" touch panels
Epson Brightlink 1485Fi projector and screen
Newline TT8619IP 86" touch displays
Lumens VCB30UB PTZ cameras
AV Pro video distribution

T.V.S.Pro Team

AV Consultant: James Bollinger
