

# Southern Utah University Student Center

## TVS Pro Project

SUU wanted to install a 220" Direct View LED wall inside the Sharwan Smith Student Center lobby. They wanted the ability to configure up to 8 different video sources: 4 Brightsign players and 4 video signals. They wanted to show either picture in picture, or 4 video signals arranged in 2 x 2 - in any way with any of the 8 sources. They also wanted speakers and the ability to provide 2 audio outputs. All of this would be controlled using an Extron touchscreen.

Wall re-framing was done by client with fire-rated plywood backing and paint provided by TVS Pro. Client provided 4 cable/satellite box signals. All other equipment was provided by, installed, and programmed by TVS Pro.

**Owner:** SUU

**AV Consultant:** Dan Austin

**AV Project Manager:** Dave Begay

**Lead Installer:** Alex Nisbet

**Programmer:** Zach Anderson

**Key AV equipment:**

Sharp NEC Video wall (16' x 9') with  
Novastar processor  
4 Brightsign players  
AVPro Edge Matrix Switcher  
JBL Speakers  
Extron Control
