

Pine Valley Home Theater

TVS Pro Project

The customer wanted a custom Hi-end home theater system, a flat panel framed TV in his great room, and a distributed audio system throughout the house. We designed, engineered, programmed, and installed each portion. The home theater consisted of a Control 4 control system, an Anthem receiver, a Kaleidescape 4K media server, a JVC laser projector, an EPV 4K screen, in-wall and in-ceiling paradigm speakers, and 2 SVS subwoofers. Primeacoustic sound panels were installed for acoustics. For the great room, a Samsung frame TV was installed. A VSSL distributed audio system was installed throughout the house with Paradigm in-ceiling speakers. Two wireless access points were installed for coverage.

Key AV equipment:

Control 4 System, JVC DLA-NZ8R Laser Projector, EPV 4K Projection Screen, Anthem MRX-1140, Kaleidescape 4K Ultra HD 6TB, Paradigm In-Wall & In-Ceiling Speakers, 2 SVS SB3000 Subwoofers, Primeacoustic Wall Treatment, VSSL Distributed Audio System, Samsung Frame TV
