

# TVS Pro Showroom Update

## TVS Pro Project

For our TVS Pro main showroom we were looking for a way to display and actively demo a space that would support both Zoom and Microsoft Teams. For walk-in customers. For this, we created two spaces on our showroom floor to work together for a meeting demonstration. For one space, we used a Logitech Rally Bar, a Roommate collabOS appliance, a Tap IP touch controller, and a Logitech Swytch laptop link. For the other space, we used a Yealink MVC960 Microsoft Teams Rooms system bundle which included two Yealink UVC86 PTZ cameras, an MTouch II touch panel, an AVHub, two WPP20 wireless presentation pods, and one Yealink MVC-BYOD extender.

Customers can come in anytime or schedule a demo with one of our TVS Pro account reps to ensure any questions are answered.

### T.V.S.Pro Team

#### Lead Installers:

Geoff Barry  
Dalton Parker

**Programmer:** Dalton Parker
